LETTER FROM THE PRESIDENT

Dear colleagues and friends,

The Balkan Association of Plastic Reconstructive and Aesthetic Surgeons is delighted and honoured to host our 9th Congress, in Thessaloniki, from 17 to 20 September 2015. Co host, in this exceptional occasion, is the Turkish Society of Plastic, Reconstructive and Aesthetic Surgeons.

This congress gives us the opportunity and the pleasure to welcome you all to the centre of Thessaloniki and to a full scientific programme, with round table discussions, keynote lectures and eminent guest speakers. The venue of Thessaloniki is highly significant in the history of B.A.P.R.A.S. The first meeting of our Association was held here, back in the distant 1999, during which the ambitions and hopes of the participants were orchestrated into the cohesive organization, we became today.

We are pleased you can join us in sharing developments in our specialty, your specialized knowledge and your surgical skills. BAPRAS congresses have always been forums for research and development in all fields of our specialty, in the region and well beyond. Our current congress is designated for a maximum of, or up to 18 European CME credits (ECMEC) by the European Accreditation Council for Continuing Medical Education (EACCME).

There is a full social programme so that you will be able to enjoy, with your family and friends, all the best in tradition, culture and entertainment that our part of the world has to offer and, there will be opportunities to extend your stay to see more of the country, if you wish to do so.

The Organizing Committee and its president will do everything within our power to turn this congress into a memorable experience, scientifically, as well as, socially. We wish you all a productive congress and an enjoyable stay.

Konstantinos Manos

Plastic Surgeon

President of the Organizing Committee

The world of Plastic Aesthetic and Reconstructive Surgery is an exciting area in which to work, and we'll continue to meet and bring inspired people together in forums like this, to ensure our organization remains at the cutting edge. We should all be very proud of where we are today and excited about where we are headed.

I'd like to thank the Organizing Committee and its President Dr. Manos for their utmost efforts making this organization the best and unforgettable both by means of scientifically and socially one until now.
